December 3rd - 4th, 2009 (Alpharetta, GA)
NeuroMatrix

Solutions by the people of Zimmer Spine.
zimmerspine.com

Overview

Zimmer Spine is at the forefront of MIS lumbar fusion surgery. Our innovative products and comprehensive trainings enable surgeons to offer complete MIS solutions to a growing number of patients.

Objectives

Upon completion of this training course, surgeons will be able to:

- Identify surgical indications for MIS procedures.
- Demonstrate pedicle targeting and screw placement using fluoro.
- Demonstrate compression, distraction and reduction of pedicle screws.
- Perform a TLIF procedure with placement.

Agenda

- Benefits of Minimally Invasive Spine Surgery
- Overview of Surgical Technique
- Demonstration of *PathFinder*
- Overview of TLIF
- Demonstration of TLIF Procedures
- Hands-On Cadaver using *PathFinder* and TLIF

Online Registration

Registration, travel and hotel arrangements, can be made online at www.zimmerpine.com.

Note: This course is not CME Accredited.
