

***Title***

**CEMENTLESS METASUL METAL-ON-METAL TOTAL HIP ARTHROPLASTY  
IN PATIENTS LESS THAN FIFTY YEARS OLD**

***Authors***

Kim SY, Kyung HS, Ihn JC, Cho MR, Koo KH, Kim CY

***Publication***

*Journal of Bone and Joint Surgery.* 2004;86A:2475

***Purpose/Premise***

This article reports on a review of the intermediate-term results of young, active patients who underwent cementless THA with *Metasul* Metal-on-Metal Bearings.

***Material and Methods***

Sixty patients (68 hips) were followed-up after a mean of seven years.

***Outcomes***

No components were radiographically loose.

***Conclusion/Recommendation***

The authors concluded that, at a mean follow-up of seven years, *Metasul* Bearings showed a low rate of osteolysis and aseptic loosening in young patients.
