

You know what it takes to improve patient recovery time.

So do we.

PathFinder is a unique, easy-to-use, minimally invasive screw pedicle system which was designed with both the patient and surgeon in mind. This versatile system uses a modified Wiltse technique that combines the familiarity of an open procedure with the patient benefits of a minimally invasive approach. Backed by a history of clinical success, PathFinder comes complete with industry-leading training and service and represents yet another example of how Abbott Spine delivers the expertise you need — at your side.

PathFinder[®]

Minimally Invasive Pedicle Screw System

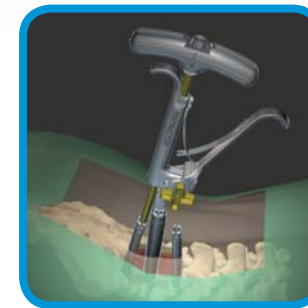

Expertise at your side.

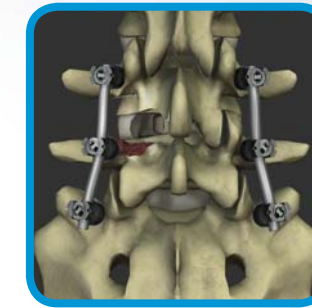

PathFinder's features include:

- Traditional top-down rod placement through a familiar muscle-splitting-and-sparing Wiltse approach

- Advanced reduction, compression and distraction capabilities

- The ability to complete multi-level constructs with optimal efficiency

Additional features:

- New implants and instruments, including 4.5mm screws, awl taps for one-step tapping, improved reduction knobs for a controlled reduction up to 20mm and a unique revision tool to simplify the removal process if necessary
- Part of a complete MIS portfolio, including Harmony™ Posterior instruments, Harmony Retractor and Harmony Port Systems, as well as a variety of interbody options

Discover the one-of-a-kind PathFinder.
